

MoneyBolt

The ecosystem within everyone's reach.

Problems

Here are the critical issues affecting the online services sector.

The other Cryptocurrencies

- Hyperinflation (Uncontrolled issuance of money).
- Pollution (High electricity consumption).
- Manipulation of the markets (Alteration of the price by the capitalists).

Centralized casino

- Withdrawal times (1 to 5 working days).
- No data transparency (Transactions / Algorithms).
- Risk of exposure of personal data.

The other Metaverses

- Access limited to Desktop users.
- Low graphic quality.
- Lack of cross-platform interoperability within the metaverse.

Solutions

Here are the MoneyBolt solutions for the innovation of blockchain technologies.

Financial management

- Limited quantity of coins.
- Low power consumption.
- Anti-whale system.

Decentralized casino

- Almost instant transfers.
- Transparency of data.
- Absence of sensitive data.

Revolutionary Metaverse

- Multi-device metaverse.
- High quality content.
- Multi-platform interoperability.

MoneyBolt

Our mission is to become one of the best blockchain services companies, driving the adoption of digital currency around the world.

Enjoy MoneyBolt services

Multiplatform

Users will be able to use our services on the move, directly from their smartphone.

Easy to use

The interface and operation of the MoneyBolt services is simple, clear and intuitive.

Open and accessible

MoneyBolt can interact with other Blockchain services, allowing users to easily integrate with the ecosystem.

Safe and secure

The ethereum network natively provides robust security features. We will also use advanced algorithms for capital protection and management. (Liquidity, Casino and Metaverse).

How MoneyBolt was born

MoneyBolt was born with the idea of providing decentralized and secure services.
